Supply Chain Network

Real-time Supply Chain Visibility

ZetesOlympus is a collaborative supply chain intelligence tool which enables real-time operational visibility and alerts around the critical events and inventory flows across your end-to-end partner and carrier network.
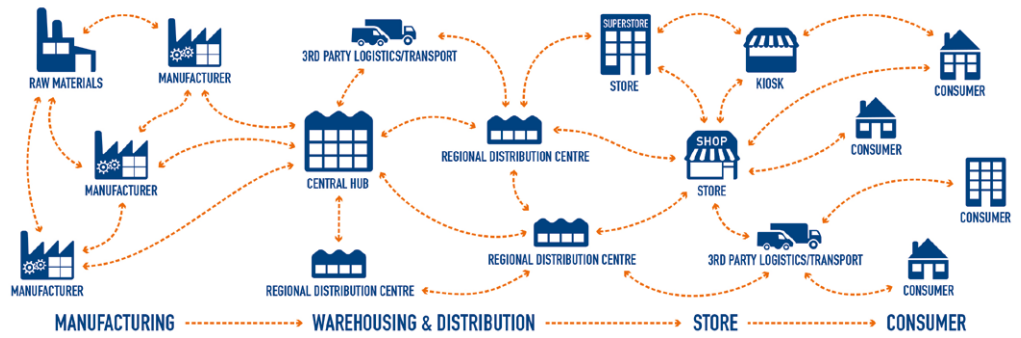

Maximising Perfect Order Fulfilment and Supply Chain Efficiency

| Real-Time Supplier KPI Tracking / Predictive Alerts	+	High % Perfect Order Rate / Customer Satisfaction	+	Greater Efficiency and Reduced Costs
• Predictive alerts of event delays, failures and potential disruption		• Increased sales through less stock-outs		• Improved resource efficiency, inventory, call centre, labour…
• Improved OTIF (on-time-in-full) achievement		• Reduced non compliance costs / penalties		• Reduced disruption remedial costs
• Optimised supplier performance / utilisation		• Dynamic order re-routing / re-allocation enablement		• Faster dispute resolution and payment

Stay Agile with 360° Visibility and Predictive Alerts

• Manage critical performance issues across your extended supply chain network with 'Big Picture' visibility.

• Receive predictive alerts to view at-risk events which could disrupt planned schedules.

• Leverage IoT technology for remote event capture.

• Build collaboration amongst logistics providers, carriers and suppliers.
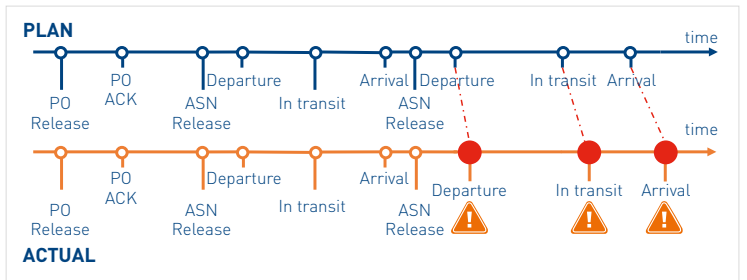

Empower your Team with Custom Dashboards

• Customise dashboards to specific roles and required granularity of reporting.

• Gain complete and accurate visibility into individual order and inbound/outbound shipment status across your end-to-end supply chain.

• Fine tune alerts for specific stakeholder roles and according to planned milestones.

• Stay updated wherever you are through secure, easy access to the web portal.
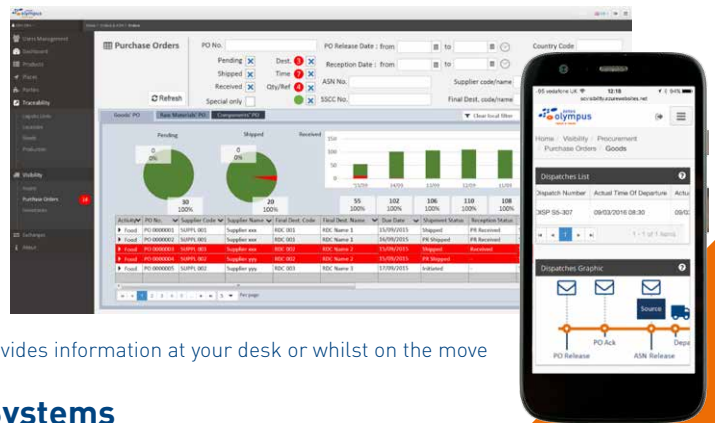

Web-based access provides information at your desk or whilst on the move

Bridge and Harmonise Disparate Information Systems

• Leverage your supply chain partners information systems to access and filter critical event data.

• Interface to the ZetesOlympus data hub to harmonise and display what's relevant to your stakeholders.

• Future-proof your investment through flexibility and scalability to meet tomorrow's requirements.

Reap the benefits faster and cost effectively with zero risk to existing systems
