

ZetesChronos

Full visibility on your
delivery process

Raise the bar for Proof of Delivery services

Whether you are a transport company, parcel and courier or logistics service provider, you know how critical it is to deliver goods to the right place, at the right time, at the lowest possible cost. Integrating 30 years of expertise, ZetesChronos helps you to raise the bar for Proof of Delivery services with differentiating services, efficient operations and in-depth business insight of service which outperforms your competitors.

Whether you are currently working paper-based or with mobile devices, ZetesChronos will boost performance and offer unrivalled services quality:

More flexible service

With the ZetesChronos Proof of Delivery solution you **give your customers greater service flexibility**: last-minute pick-ups and deliveries, real-time visibility on the status of their goods, visual proof of condition ...

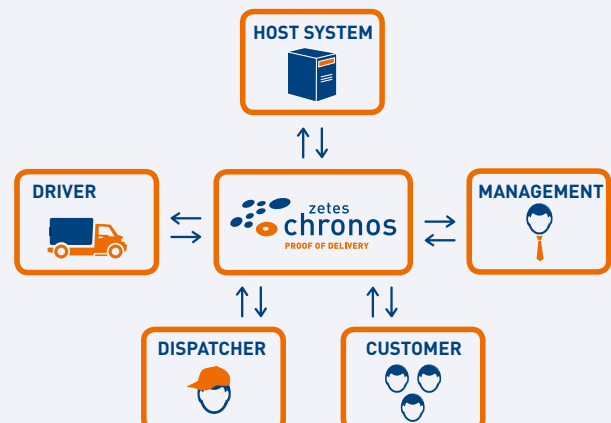

Better insight

With the ZetesChronos Proof of Delivery solution you **gain more insight into your delivery process to make better decisions**: track & trace events in real-time, organise operations more efficiently, shorten lead times, manage mobile applications easily ...

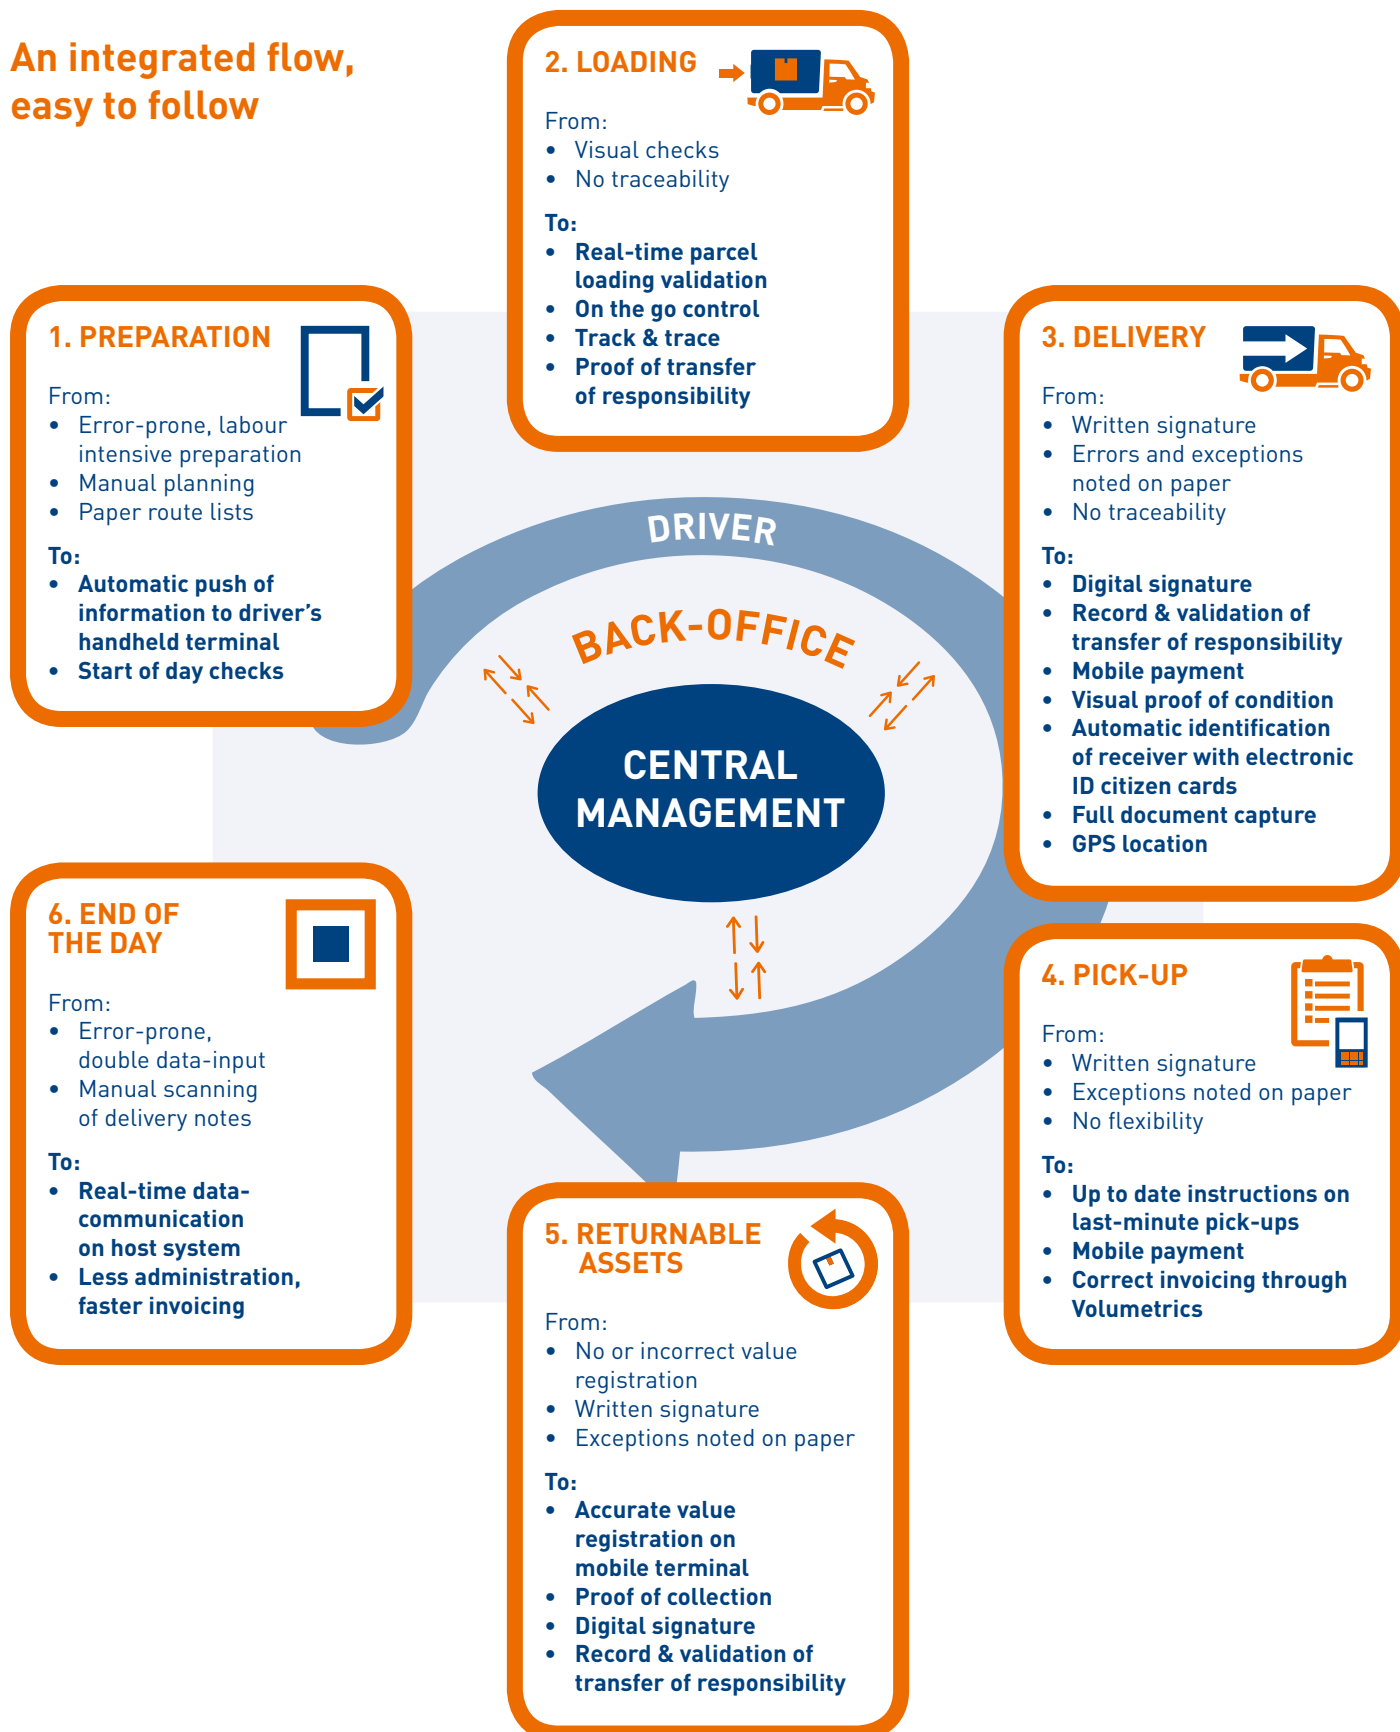

Connected at every stage

ZetesChronos is a Proof of Delivery mobility solution that extends the Warehouse Management Systems (WMS) or Transport Management Systems (TMS) to the operational field. Drivers use mobile devices to receive instructions and register all events during pick-up and delivery. Information is communicated in real-time with the host system and back-office, whilst track & trace or reporting modules provide insights for both customers and management.

An integrated flow, easy to follow

Easy to use,
easy to manage

Manage your mobile workforce from behind your desk

No more time-consuming, costly, complex management of mobile applications. With the cloud-based MCL Mobility Platform you can manage, deploy and store mobile applications centrally:

- Operating independently of operating systems, devices, applications, locations - and the IT department's coding capacities
- Scalable approach, built on elastic cloud computing architecture
- For small to very large customers, the 'pay as you grow' principle allows easy addition of users

All-in-one solution

ZetesChronos is a complete solution, including software, infrastructure and platform. It is delivered in a Cloud Computing model:

- Easy to deploy and scale, no extra IT infrastructure cost
- Pay per device, with no capital investment

The ZetesChronos platform

Get access to the latest innovations and features through a set of functional modules adapted to your specific business needs.

ZETESCHRONOS MOBILE

CONSULTANCY, MAINTENANCE, SUPPORT		

ZetesChronos

Full impact on your entire business

Efficient Process Execution

Less errors and more productivity and efficiency with an easy-to-use approach:

- Clear real-time instructions on the mobile terminal (loading manifest, customer address details ...)
- On the go validation when loading / unloading incorrect items. No more items lost in transport
- Direct input of exceptions at point of delivery - digital signature capture, image capture for damage ...
- Mobile payment eliminates the need to carry cash

Flexible Operations Organisation

Real-time connectivity between driver and back-office speeds up and streamlines day-to-day operations:

- Agile management of re-assignments or last-minute pick-ups and deliveries through real-time visibility on driver status. Complete visibility of transfer of ownership
- Instant customer communication in case of incidents (traffic delays, customer not at home)
- Less administration and faster invoicing: no need to process paper delivery notes at the end of day, no errors due to illegible or lost delivery notes
- Track and trace all events: incidents, deliveries, travel times ...

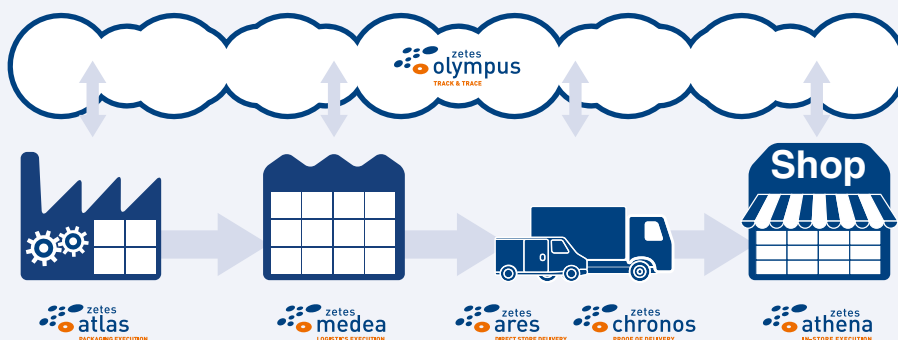

Better Business Management

Access to detailed business information helps making better decisions:

- KPI reports & benchmarking of processes and results within and across sites e.g. delays and bottlenecks, customer claims, duration of lead times ...
- Real-time business intelligence to
 - Improve customer service and company performance
 - Make market behaviour predictions

ZETES' COLLABORATIVE SUPPLY CHAIN SOLUTIONS

ZetesChronos is part of Zetes' collaborative supply chain solutions suite. Its process optimisation solutions for Packaging, Warehousing, Proof of Delivery, Direct Store Delivery and In-Store management, connected by a Track & Trace repository, enable organisations to achieve operational efficiency and end-to-end product traceability, from manufacturer right through to the household.
